The microfiber filter MicroPlastics LUV-R from Environmental Enhancements

Individuals & businesses have been using these lint filters for over 15 years with over 10,000 units in use. They are used in homes, laundromats, veterinarian hospitals, medical and dental clinics, hair salons, campgrounds, cruise ships and fishing vessels.

The filters are present in many countries around the world, such as in the USA, in Canada, Australia, New Zealand, Italy, Iceland, UK, Germany, Sweden, Norway, Chile, Argentina, and the Falkland Islands.

MicroPlastics LUV-R prevents septic system failure and microplastic contamination of marine environment by removing lint and untreatable synthetic solids from washing machine discharge.

The stainless steel filter can easily be removed, cleaned and reinstalled, and will last a lifetime. Replacement parts (if ever required) are available on the website: [environmentalenhancements.com](http://environmentalenhancements.com).

There is a 5-year warranty on the product.
